

## **7H Green Story**

### **Our Green Story: Hospitality with a Purpose**

At 7 Hospitality Management, we believe luxury and sustainability go hand in hand. As stewards of both hospitality and the environment, we've made it our mission to lead the industry in eco-conscious innovation—without compromising on comfort or quality.

### **Our Vision**

To create a global hospitality experience that protects the planet, uplifts local communities, and inspires sustainable living—one stay at a time.

### **Our Commitments**

#### **1. Carbon-Conscious Operations**

We actively measure and reduce our carbon footprint across all managed properties. Through energy-efficient appliances, smart building technologies, and renewable energy sources, we are targeting a 50% emissions reduction by 2030.

#### **2. Zero-Waste Philosophy**

From food waste to packaging, we've adopted a circular mindset. We partner with local composting programs, eliminate single-use plastics, and prioritize upcycled, biodegradable, and reusable materials.

#### **3. Water Stewardship**

Water is precious. That's why our hotels are equipped with low-flow fixtures, greywater recycling systems, and smart irrigation—all while maintaining the luxury our guests expect.

#### **4. Sustainable Sourcing**

We support local farmers, artisans, and ethical supply chains. Our kitchens feature farm-to-table menus and certified sustainable seafood, while hotel amenities are curated with eco-friendly, cruelty-free brands.

#### **5. Green Building Standards**

Whether renovating historic hotels or building new ones, we meet or exceed LEED, BREEAM, and EDGE standards. Materials are responsibly sourced, and designs are optimised for energy efficiency and natural light.

#### **6. Empowering Local Communities**

Sustainability is also social. We hire locally, train staff in green practices, and reinvest in the communities where we operate. Our community programs support reforestation, clean water, and education initiatives.

### **Results That Matter**

- X% of our properties now run on renewable energy
- X% of waste is diverted from landfills across managed hotels
- X% of our branded toiletries are plastic-free and biodegradable
- Over X litres of water saved monthly through conservation efforts

### **Together, We Go Further**

Sustainability isn't a destination—it's a journey. At 7 Hospitality Management, we're not just managing hotels—we're reimagining what hospitality can be in a changing world.

Join us. Stay consciously.
